

## 4.2S BLACKNESS SIMILARITY

### Gradlikhet

Svarthet. Sorter prøvene i tre grupper med ulike grader av svarthet (høy, middels og lav). Innen hver gruppe skal fargene være svarthetslike.

Monter prøvene gruppevis i rutene og marker graden av svarthet med en strek i resp. fargetriangel. Marker også gjerne hver enkelt farge plasseringen i fargetriangelen og fargesirkelen.
